SUPPLEMENTARY QUESTIONS

PATIENT DECLARATION for patients who are **not ordinarily resident in the UK**

Anybody in England can register with a GP practice and receive free medical care from that practice.

However, if you are not 'ordinarily resident' in the UK you may have to pay for NHS treatment outside of the GP practice. Being ordinarily resident broadly means living lawfully in the UK on a properly settled basis for the time being. In most cases, nationals of countries outside the European Economic Area must also have the status of 'indefinite leave to remain' in the UK.

Some services, such as diagnostic tests of suspected infectious diseases and any treatment of those diseases are free of charge to all people, while some groups who are not ordinarily resident here are exempt from all treatment charges.

More information on ordinary residence, exemptions and paying for NHS services can be found in the Visitor and Migrant patient leaflet, available from your GP practice.

You may be asked to provide proof of entitlement in order to receive free NHS treatment outside of the GP practice, otherwise you may be charged for your treatment. Even if you have to pay for a service, you will always be provided with any immediately necessary or urgent treatment, regardless of advance payment.

The information you give on this form will be used to assist in identifying your chargeable status, and may be shared, including with NHS secondary care organisations (e.g. hospitals) and NHS Digital, for the purposes of validation, invoicing and cost recovery. You may be contacted on behalf of the NHS to confirm any details you have provided.

Please tick one of the following boxes:

- a) ☐ I understand that I may need to pay for NHS treatment outside of the GP practice
- b) ☐ I understand I have a valid exemption from paying for NHS treatment outside of the GP practice. This includes for example, an EHIC, or payment of the Immigration Health Charge ("the Surcharge"), when accompanied by a valid visa. I can provide documents to support this when requested
- c) ☐ I do not know my chargeable status

I declare that the information I give on this form is correct and complete. I understand that if it is not correct, appropriate action may be taken against me.

A parent/guardian should complete the form on behalf of a child under 16.

DATA SHARING

We will not disclose your information to third parties without your permission unless there are exceptional circumstances, such as when the health or safety of others is at risk or where the law requires information to be passed on. However, your medical record is shared under the NHS with the Health and Social Care Information Centre (HSCIC), the Summary Care Record (SCR) and the Hampshire Health Record (HHR).

Care and Health Information Exchange (CHIE) is a secure system which shares health and social care information from GP surgeries, hospitals, community and mental health, social services and others. CHIE helps professionals across Hampshire, the Isle of Wight and surrounding areas provide safer and faster treatment for patients. The Red and Green Practice has signed up to share patient data to CHIE, coded data for your registered patients is fed to CHIE on a daily basis. To protect patient privacy and confidentiality, only health and social care professionals who are involved in the care of that patient are allowed access to CHIE.

The information that The Red and Green Practice provides is also used to improve future care for patients. This helps plan NHS services and supports medical research. To keep your information safe it is moved to a separate database called 'Care and Health Information Analytics' (CHIA) and changed so that it cannot be used to identify any individual patient. Data is never shared for the benefit of commercial companies like drug manufacturers. People who analyse data on CHIA do not have access to CHIE, so cannot identify them.

Summary Care Record is a record that will contain important information about any medicines you are taking, allergies you suffer from and any bad reactions to medicines that you have had. This does not include diagnosis or procedures. Giving healthcare staff access to this information can prevent mistakes being made when caring for you in an emergency or when your GP practice is closed.

EMIS Data Sharing is a real time surveillance system based from >3000 EMIS UK general practices. It forms a critical part of the UK emergency response to pandemic flu, natural chemical disasters. It collects, analyses/reports diseases rates vaccine uptake. Only data aggregated by age/sex is collected (i.e. counts of patients with diseases). No individual patient data is extracted; there is no risk to patient confidentiality. It is run as a collaboration between the University of Nottingham, EMIS Clinrisk Ltd. It is approved by the BMA, MREC, NUG and RCGP.

Studies and Trials The practice collaborates in NHS approved research trials from time to time to lead in the prevention, diagnosis, treatment and management of illness and disease in primary care.

OPTING OUT OF DATA SHARING

If you are happy for your information to be used in this way you do not have to do anything.

You have the right to prevent confidential information about you from being shared or used for any purpose other than providing your care, except in special circumstances.

To prevent your medical records from being shared please ask for an Opt Out Pack from Reception.
